

## Panel 4. Energy and Environmental Management

Managing and reducing energy consumption not only saves money but also helps in mitigating climate change and enhancing corporate reputation. The primary objective of energy management is to achieve and maintain optimum energy procurement and utilization, throughout the organization which may help in minimizing energy costs and mitigating environmental effects. In fact, energy management is widely acknowledged as the best solution for direct and immediate reduction of energy consumption.

Environmental Management offers research and opinions on the use and conservation of natural resources, protection of habitats and the control of hazards, spanning the field of environmental management without regard to traditional disciplinary boundaries. Congress aims to improve communication, making ideas and results from any field available to practitioners from other backgrounds.
